

Rockfon CurvGrid™ Curved Ceiling System with EZ-Flex™ Panels

Applications

Dramatic waved ceilings, islands, vaults and transitions between ceiling heights in small- and large-scale interior spaces.

Features

CurvGrid™

- 2' x 4', 2' x 6' and 2' x 8' EZ-Flex panels with integral tabs.
- EZ-Flex (patent pending) panels assemble on site floor without use of tools for faster installation.
- Grid suspension system curved in the vertical axis.
- Smooth grid surface without crimped tees.
- Patented Primary Carrier support for tees and trim.

CurvTrim™

- Vertically curved perimeter trim for CurvGrid ceilings.
- Sturdy extruded aluminum for high quality perimeter treatment.
- Tight butt joint splices and miters.
- Single section trim eliminates additional tees around perimeters.

Benefits

- Reduces installation cost by up to 50%.
- Quality architectural fit and finish.
- Greater aesthetic appeal with fewer hanger wires.
- Sustainable: 75%-100% recycled content; 100% locally recyclable.

Material:

Curved and straight main tees connected to form 24" wide standard or custom ceiling modules. Ceiling perimeter finished with CurvTrim. Ceiling modules filled with flexible infill panels.

Components:

1. Main Tee: Electrogalvanized cold rolled steel.

Curved and Straight (radius and length per order)
