

## Chicago Metallic® 6-Foot Drywall Tee Installation

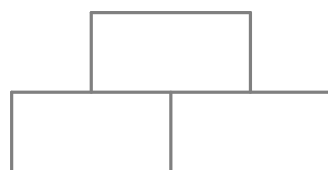

Chicago Metallic 6-foot cross tees increase installation efficiency, allowing for main runner spacing to be pushed out to 6 feet on center (O.C.), reducing main runners and hanger wires in a given space. Always stagger the butt joints and install the long edges of the drywall sheets parallel to main runners.

### NON FIRE RATED CEILINGS

#### 640 and 660 Furring Runners - 6 feet O.C.

24"

Staggered butt joints  
Side joints parallel to main runners

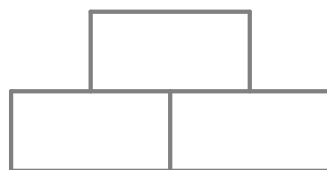

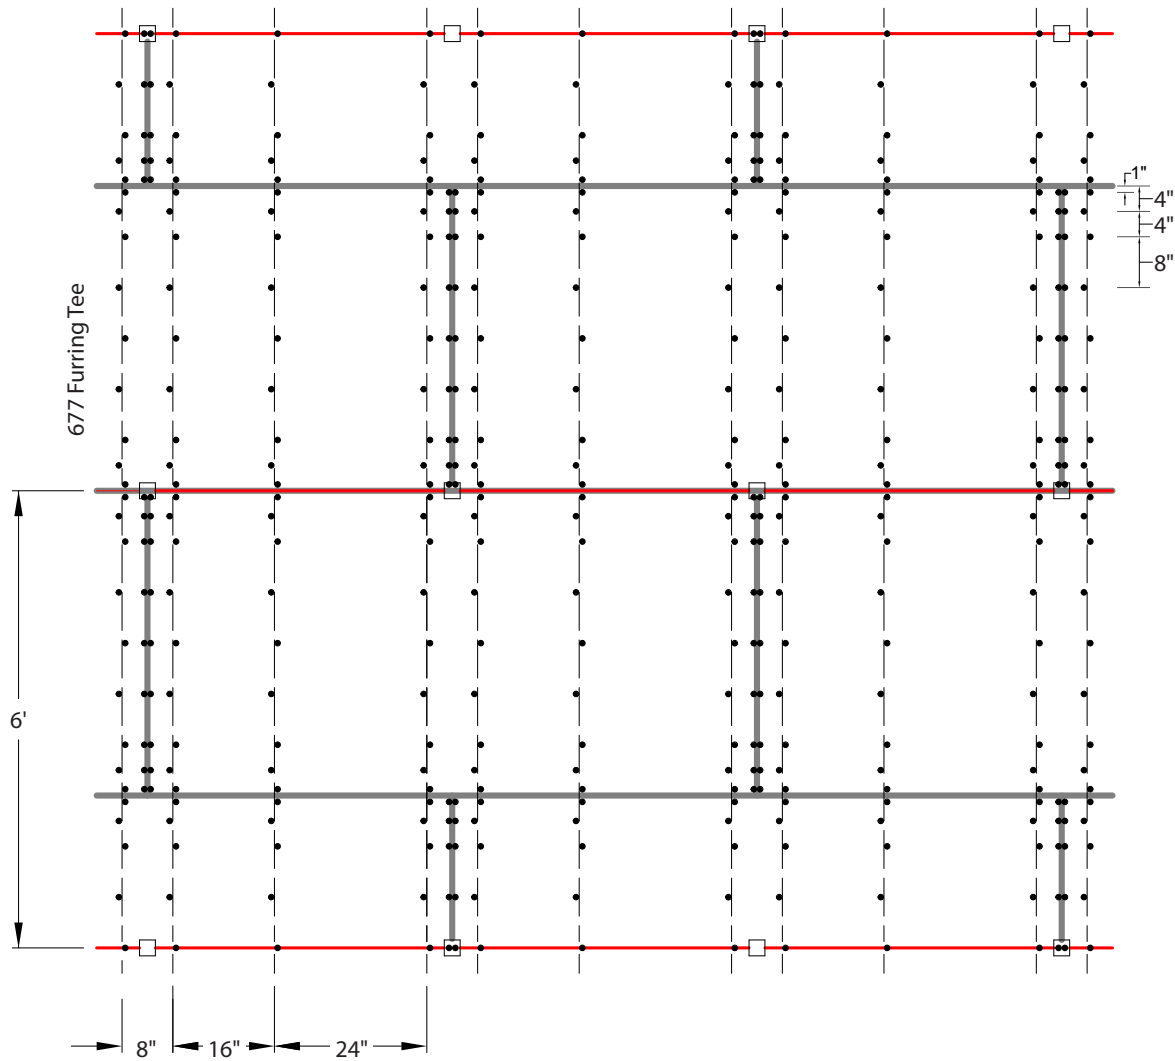

- = Hanger Wires
- = Drywall Screws
- - - = Furring Tee
- (red) = Furring Runner
- (grey) = Drywall Joint

# Chicago Metallic 6-Foot Drywall Tee Installation

## FIRE RATED CEILINGS

3-hour fire rated UL Design No. H506 shown, for further information please refer to [UL.com](http://UL.com)

### 670 Furring Runners - 6 feet O.C.

Staggered butt joints  
Side joints parallel to main runners

- = Hanger Wires
- = Drywall Screws
- - - = Furring Tee
- (red) = Furring Runner
- (grey) = Drywall Joint
